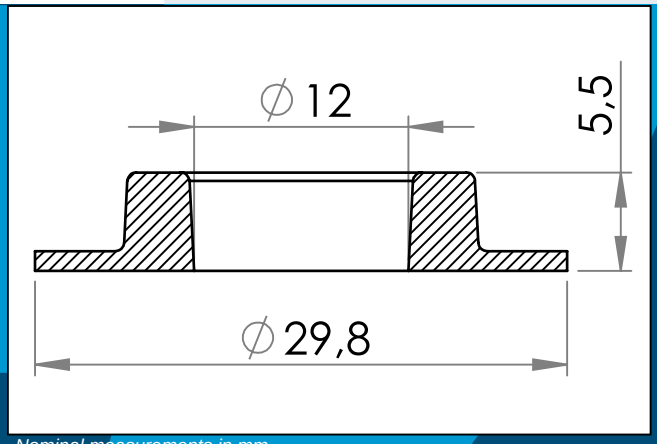
04-101 PVC Eyelet, Heavy, 11 mm

11/30 mm plastic eyelet with square shoulders. Heavy duty design for demanding applications. Optimised for High Frequency (HF) welding.



Nominal measurements in mm

Plastic eyelet with square shoulders and ID=11 mm / OD=30 mm.
Typically used for hole reinforcements in banners, tarpaulins, building wraps etc. Geometry and material optimised for High Frequency (HF) welding.
HF Welded PVC and plastic eyelets will fuse together with the foil and result in a joint that is significantly stronger and can withstand significantly higher pull forces than metal eyelet. This is especially true when working in mesh materials.
PVC and plastic eyelets will not tear out and will not rust and stain the material. They can be colour matched to the fabric and will make recycling of PVC and vinyl banners much easier.

Materials:	PVC
Std. packaging:	4 x 2.000
Related products:	04-121, 04-122, 04-123, 04-125
