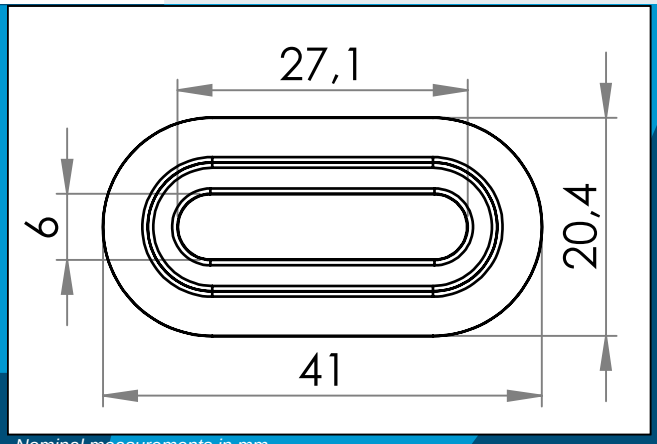
04-134 Oval PVC Eyelet 6 × 27 mm

Oval PVC eyelet with square shoulders for HF welding onto banners, tarpaulins, building wraps etc. 6x27 mm hole.



Nominal measurements in mm

Oval PVC eyelet with square shoulders and 6x27 mm elongated hole. Typically used for hole reinforcements in banners, tarpaulins, building wraps etc. HF Welded PVC eyelets will fuse together with the foil and result in a joint that is significantly stronger and can withstand significantly higher pull forces than metal eyelet. This is especially true when working in mesh materials. PVC eyelets will not tear out and will not rust and stain the material. They can be colour matched to the fabric and will make recycling of PVC and vinyl banners much easier.

Welding times of 1.5 seconds for single eyelets and 2-3 seconds for double eyelets are typical - depending on the HF generator used and the thickness and layers of sheets to weld.

Materials:	PVC
Std. packaging:	4 x 3.000
Related products:	04-204, 04-206, 04-403, 04-205
