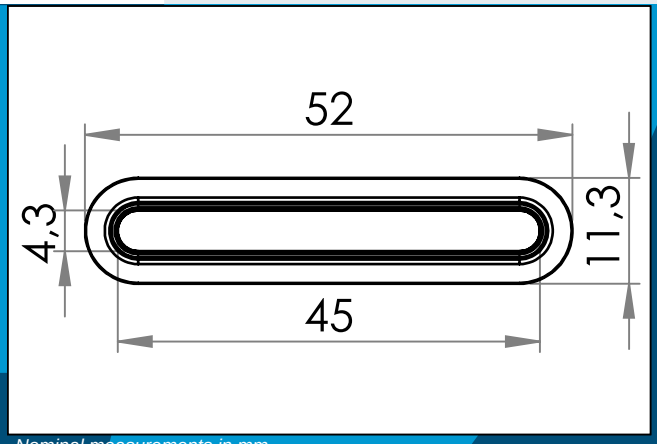
04-140 Oval PVC Eyelet 4 × 45 mm, Light

Oval PVC eyelet with rounded shoulders for High Frequency welding onto banners, tarpaulins, building wraps etc. 4 x 45 mm hole.



Nominal measurements in mm

Oval PVC eyelet with rounded shoulders and 4 x 45 mm elongated hole. Typically used for hole reinforcements in banners, tarpaulins, building wraps etc. HF Welded PVC eyelets will fuse together with the foil and result in a joint that is significantly stronger and can withstand significantly higher pull forces than metal eyelet. This is especially true when working in mesh materials. PVC eyelets will not tear out and will not rust and stain the material. They can be colour matched to the fabric and will make recycling of PVC and vinyl banners much easier.

Welding times of 1.5 seconds for single eyelets and 2-3 seconds for double eyelets are typical - depending on the HF generator used and the thickness and layers of sheets to weld.

Materials:	PVC
Std. packaging:	4 x 5.000
Related products:	04-141
