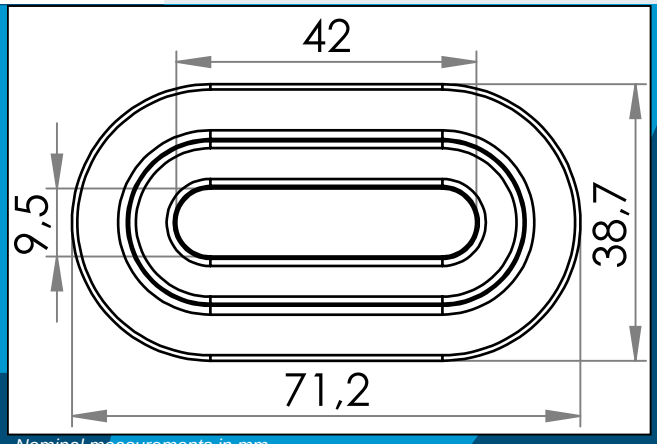
04-204 Oval PVC Eyelet 9 × 42 mm

Oval PVC eyelet with square shoulders for HF/RF welding to banners, tarpaulins, building wraps etc. 9 x 42 mm hole. Forms a lock with plastic cleat 05-446



Nominal measurements in mm

Oval PVC/PUR eyelet with square shoulders and 9 x 42 mm elongated hole. Typically used for hole reinforcements in banners, tarpaulins, building wraps etc.
HF Welded PVC eyelets will fuse together with the foil and result in a joint that is significantly stronger and can withstand significantly higher pull forces than metal eyelet. This is especially true when working in mesh materials. PVC eyelets will not tear out and will not rust and stain the material. They can be colour matched to the fabric and will make recycling of PVC and vinyl banners much easier, as the entire banner can be processed as-is without manually removing metal eyelets
Can be used together with plastic cleat 05-446 to form a lock.

Welding times of 1.5 seconds for single eyelets and 2-3 seconds for double eyelets are typical - depending on the HF generator used and the thickness and layers of sheets to weld.

Materials:	PVC
Std. packaging:	1 x 1.250
Fits with:	PVC/PUR Strap Staple, 26/15 mm
Related products:	04-134,04-206,04-403,04-205
