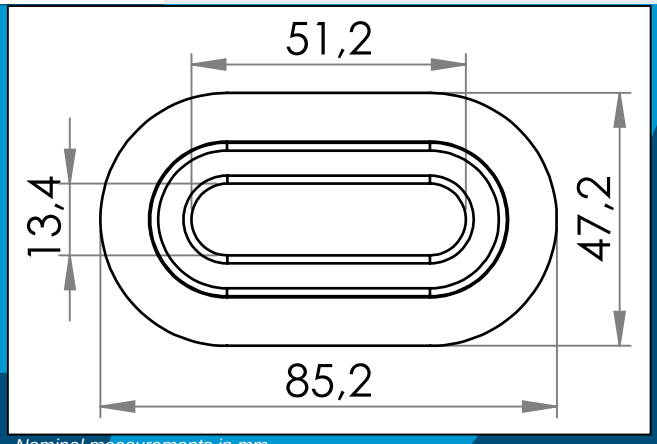
04-206 Oval Plastic Eyelet 13 × 51 mm

Oval PVC eyelet with square shoulders for HF/RF welding to banners, tarpaulins, building wraps etc. 13 x 51 mm hole. Forms a lock with plastic cleat 05-646



Nominal measurements in mm

Oval PVC/PUR eyelet with square shoulders and 13 x 51 mm elongated hole. Typically used for hole reinforcements in banners, tarpaulins, building wraps etc.

PVC eyelets will not tear out and will not rust and stain the material. They can be colour matched to the fabric and will make recycling of PVC and vinyl banners much easier.
Can be used together with plastic cleat 05-646 to form a lock.

HF Welded PVC eyelets will fuse together with the foil and result in a joint that is significantly stronger and can withstand significantly higher pull forces than metal eyelet. This is especially true when working in mesh materials.

Welding times of 1.5 seconds for single eyelets and 2-3 seconds for double eyelets are typical - depending on the HF generator used and the thickness and layers of sheets to weld.

Materials:	PVC, PVC/PUR
Std. packaging:	1 x 1.200
Fits with:	Reinforced strong PVC Cleat / line support, heavy duty, Plastic Rounded Staple, 23/25 mm
Related products:	04-134,04-204,04-205,04-403
