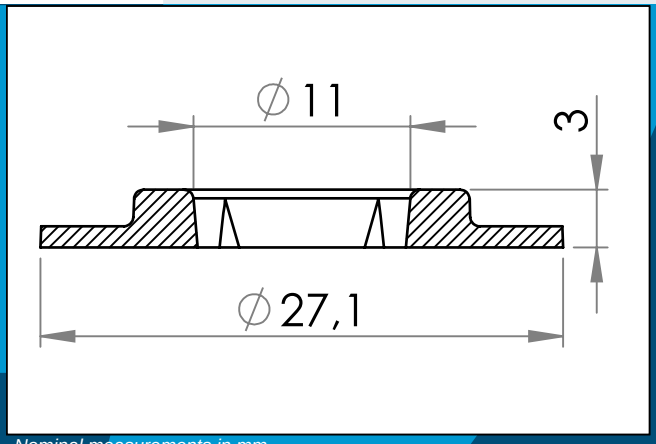
04-275 Weldable Plastic Eyelet 11 mm, Stacked

11/27 mm heavy duty plastic eyelet with square shoulders. Optimised for HF welding and use in automatic machines



Nominal measurements in mm

11/27 mm heavy duty plastic eyelet with square shoulders.
Typically used for hole reinforcements in banners, tarpaulins, building wraps etc. Geometry and material optimised for High Frequency (HF) welding.
HF Welded PVC and plastic eyelets will fuse together with the foil and result in a joint that is significantly stronger and can withstand significantly higher pull forces than metal eyelet. This is especially true when working in mesh materials.
PVC and plastic eyelets will not tear out and will not rust and stain the material.
Plastic Eyelets can be colour matched to the fabric and will make recycling of banners and tarpaulins much easier.

Materials: PZ33, standard PVC compound, hardness 45+/-2 Shore D, PY28, modified for operating temperatures down to –20°C, hardness 51+/-2 Shore D. Available in PE too for PE based materials.

Materials:	PELD, PVC, PVC/PUR
Std. packaging:	3 x 4000
Related products:	04-274,04-277,04-278,04-279
