09-212 Medical 8 mm Elbow Connection 90° With Tube Stop

Weldable right angle tube connector for medical and other applications. Features an internal tube stop. Designed for tubing wth Ø8mm outer diameter.

Nominal measurements in mm

Weldable right angle tube connector for medical and other applications. Features an internal tube stop

Both material and geometry of the Elbow connections are optimized for HF welding / Ultrasonic welding. Welding times of 1.5 – 2 seconds are typical, depending on the HF generator used and the thickness of the material used.

The bottom of the hole is a snug fit for hardere tubing, however bonding is advised in applications other than for very low pressure.
Carmos unique PVC/polyurethane blend HF welds extremely well to polyurethane coated substrates.

Materials:	PVC/PUR
Std. packaging:	1 x 4.000
Related products:	09-002, 09-211, 09-229, 09-210
