09-099 PVC Button 13.9 mm

HF/ultrasonic weldable button

Nominal measurements in mm

HF/ultrasonic weldable button.

Both the material and the geometry of the PVC button are optimized for High frequency welding. Welding times of 1.5 – 2 seconds are typical, depending on the HF generator used and the thickness of the material used.

Materials: PVC
Std. packaging: 1 x 25.000
Related products: 01-055, 01-112
