

QA Coordinator, Production

Great opportunity for an entrepreneurial QA profile with MedTech and Production Experience

Carmo A/S is a Danish company with a strong track record of designing, producing and selling highly specialized injection moulded plastic and PVC components to the industrial market. Production (60 FTEs) and administration (20 FTEs) are located North of Copenhagen, Denmark, and more than 70 % of the production are exported to more than 50 countries worldwide (please see www.carmo.dk).

THE POSITION

Carmo is now looking for a QA Coordinator who truly enjoys a close dialogue with both customers and colleagues, and who is able to independently undertake root cause analyses of production related QA issues and take responsibility both for training the organization and ensuring the appropriate update of the related documentation.

You will get a wide scope of responsibilities, among others to:

- Develop and maintain QA Manual and documentation
- Handle customer inquiries regarding QA issues
- Take responsibility for all QA matters related to production
- Handle questionnaires and paper audits from customers
- Compose hygiene guidelines according to GMP
- Undertake Cleaning Control
- Plan and participate in ex- and internal audits
- Elaborate input/reports to management and follow up on outstanding issues

Organizationally, you will be based in Espergaerde and report to QA Manager. You will be cooperating closely with colleagues in Product Development, Production, Sales & Marketing, Administration as well as Carmo's partners abroad.

CANDIDATE PROFILE

You have a relevant technical education and some years' experience from a production facility, as well as sufficient technical insight to enter into a meaningful dialogue with your colleagues in product development and production, as well as Carmo's customers and other stakeholders. We are looking for a really team oriented trouble shooter with a positive "can do attitude":

Further you have:

- Experience with ISO 9001 and 13485
- Experience with GMP
- Strong skills in data analysis
- Good interpersonal skills and a persevering attitude to problem solving
- The ability to prioritize and work with details without losing the big picture

You must be a native Danish speaker, and be fluent in oral and written English.

APPLICATION
